

## A change of school!

What is different? How does secondary education work? What subjects are taught? How can I prepare? What do I need to know and be able to do, so that I can succeed in this new environment?

These questions ask for answers ...

And the school sets up a program providing answers to students' concerns

## TRANSITION

A concept adapted for our students.

The linguistic sections proposed in S1 will be:

ENGLISH, GERMAN, ITALIAN, DUTCH, BULGARIAN, ROMANIAN and FRENCH.

Moreover, in S1, pupils are led to choose a third language. A very important choice for the continuation of their schooling.

# CONCEPT DE TRANSITION

A change in school life is a big event for elementary students. Like all changes, it brings uncertainties and questions. Our "transition" program must provide a maximum of answers so that students cross this new course with confidence. In order for them to move forward with this change with confidence and curiosity, we have prepared a series of activities planned throughout this school year.

## What are the planned activities?

In December, S1 students will make a presentation to each P5 class about their transition to secondary school.

In February, P5 students will attend one full class of S1.

In February / March, an L3 information meeting will be organized for students and parents. Assistant Directors will welcome you and answer your questions.

In April, P5 students will participate in a Science Day with experiments prepared in the secondary school labs.

... on Wednesday, July 4th, the transition ceremony will be organized in the Salle Polyvalent. All parents are cordially invited!
