

LISTE DES MANUELS SCOLAIRES / BOOK LIST 2024-2025 - S4

CONSEILS À SUIVRE POUR UNE BONNE UTILISATION DE CETTE LISTE :

Il s'agit d'une liste générale ; elle contient les manuels pour tous les cours et toutes les sections confondues.

Pour certaines matières (ex. histoire, géographie, sciences humaines, ...), les manuels seront communiqués en septembre.

- Regardez dans la colonne « Langue » et trouvez votre section linguistique.

- Attention ! N'oubliez pas de regarder aussi les tableaux en bas de page (liste 2 et, éventuellement, liste 3) correspondant aux cours enseignés dans d'autres langues (L2, L3, L4, L5).

- En cas d'erreur, d'hésitation ou de manque d'information, vous pouvez contacter le coordinateur de matière mentionné.

Options : Vous ne devez acheter que les livres qui correspondent aux options choisies par votre enfant. Si vous n'avez pas été contactés par l'école à ce sujet d'ici le 6 juillet 2024, cela signifie que vos premiers choix ont été respectés.

Calculatrice : Pour les cours et les examens de mathématiques et de physique, les élèves devront disposer d'une calculatrice scientifique, ni graphique ni programmable. Les professeurs ne recommandent pas de modèle spécifique, mais utiliseront pendant leurs cours les modèles pour lesquels ils disposent d'un émulateur sur ordinateur et dont l'école dispose de réserves à prêter en cas de panne le jour des tests B (ex. : TI- 30XB MultiView).

HOW TO USE THIS LIST:

This is a general booklist and contains the books for all subjects and all sections.

For some subjects (e.g. history, geography, human sciences, ...), needed books will be announced in September.

- Look at the column "Language" and find your language section.

- Be careful! Do not forget to check the charts at the bottom (list 2 and, if relevant, list 3) corresponding to courses taught in other languages (L2, L3, L4, L5).

- In case of error or missing information, you can contact the subject coordinator listed in the table.

Options: You should only buy the books corresponding to the options that your child chose. If you have not been contacted by the school about this by the 6th of July 2024, it means that your first choices were respected.

Calculator: For mathematics and physics lessons and examinations, students will need a scientific calculator, neither graphical nor programmable. Teachers do not recommend a specific model, but will use during their lessons models for which they have a computer emulator and for which the school has reserves to lend in case of breakdown on the day of the B tests (e.g. TI- 30XB MultiView).
